**Zoomoozik** comes along at a time when the music business is a cutthroat jungle, providing a level playing field with state-of-the-art technology, a place for unsigned bands and artists to have their own online guide and record label to help them develop their careers in the music industry by selling MP3 downloads and ringtones within an online music community.

Created by a wide-ranging group, **Zoomoozik** features several veterans of the music business, including a publishing/copyright solicitor, several talent executive, promoters, web programmers and graphic designers along with experts in direct online marketing, building data bases and simply "putting businesses together and getting them launched."

Launched by a team of industry vets (who also just happen to be die-hard music fans), **Zoomoozik** was created as a place for musicians to sell their music and ringtones, to learn about the ins and outs of fending for themselves within a supportive, hip environment which can nurture their careers, a transparent alternative to the fading major label dinosaur.
